In regards to claim 43 and 63-64, Stewart discloses the use of a seat comprising a base (3) having a seating surface; an armrest (2) connected to the base on the side of the seating surface and position on the side of the seating surface; wherein the armrest is adjustable along a straight line between a first and second height position relative to the seating surface; the armrest includes a connecting portion (4) that slidably fits into a corresponding receiving portion of the base; the child seat is configured for placement on a seat of the vehicle (see abstract); and the receiving portion includes a slot (figure 1) for receiving a tab located on the connected portion. In regards to claim 44, the receiving portion includes a second slot and the first and second slots correspond to the first and second positions of the armrest. In regards to claim 45, the tab (16) is attached to a flexible portion of the connecting portion of the armrest thereby allowing the tab to disengage with the slot when the tab is depressed (see page 2). In regards to claim 46, further comprising a seat has a belt path

configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle; and the connecting portion of the armrest includes a pushbutton (16) that engages one of a plurality of holes in the seat base. In regards to claim 59, further comprising an armrest is adjustable along a straight line between first and second height positions and wherein a majority of the movement of the armrest between the first and second height positions is vertically toward and away from the seating surface, see figures 1-3; the armrest includes holes for receiving protrusions from the receiving portion of the base. In regards to claim 60, further comprising the armrest is adjustable along a straight line in a vertical direction generally perpendicular to the seating surface. In regards to claim 61, further comprising the movement of the armrest is substantially upward and downward relative to the seating surface. In regards to claim 62, further comprising the first and second position of the armrest is substantially toward and away from the seating surface.
